About Us

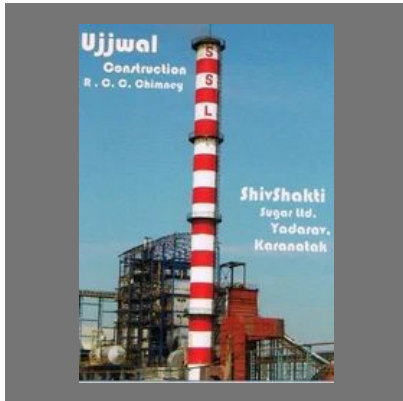

- Ujjwal Construction a fully integrated construction organisation was established in 2004, with the main objective to introduce new and novel construction techniques in the field of construction of high rise R.C.C structure, silos, chimneys by Hydraulic Jacking System to the Indian construction Industry. The long and rich Swedish Technique Experience & know-how. Furthermore, Ujjwal Construction has developed another novel form work system, the NBS Cellular construction system whereby steel form works are deployed for the R.C.C. wall which are cast simultaneously as a monolithic structure.
- For the past 11 years “Ujjwal Construction” has the credit ability of introducing “Hydraulic Jacking Technology” in the field of construction of Silos and construction of High rise civil structure by Hydraulic Slip forming and also for completing time bound projects in record times without any cost overrun.
- Ujjwal Construction has been providing services to the core industries like Power Generation, Petrochemicals, Refineries, Chemical, Sugar, Distillery, Fertilisers, Paper, Cement, Soya Bean/ food grains, Steel, Sponge Plant, etc.
